BRAD KING'S

Ultimate Libido™

Support optimal sexual energy by maintaining healthy testosterone levels.

What to expect from this product:

- Enhance libido
- Boost desire and performance
- Increase the body's natural production of testosterone
- Maintain and build muscle tissue
- Increase natural energy
- Maintain healthy erections
- Enhance orgasm intensity and duration
- Enhance the body's anabolic cycle

Most men over the age of 30 are probably starting to feel the debilitating effects of lower testosterone production, which often leads to a diminished sex drive with infrequent and weaker erections. Inadequate testosterone levels also lead to a loss of muscle size and strength as well as diminished energy levels (and this is just the tip of the iceberg). The 100%, natural ingredients within **Ultimate Libido™** work to restore a healthy testosterone status, all the while helping to enhance libido in a natural and highly effective manner.

Note: May cause male reproductive size increases (with higher doses).

Ultimate Libido™ is a stand-alone nutritional product designed to enhance both desire and performance. Too many “so-called” libido enhancers promise much and deliver little. The ingredients within this formula work in a synergistic manner to help enhance the body’s natural testosterone production.

Millions of men around the world take prescription drugs to enhance erections because they are unaware of natural alternatives that do work! Unlike pharmaceutical drugs that only work to enhance erections (i.e. sildenafil citrate or **Viagra®**) and should never be taken on a daily basis, the 100% natural ingredients within **Ultimate Libido™** are not only safe for daily use, they work to improve overall sexual health as well as sexual capacity.

A healthy sex life is obtained by much more than just a good erection. It is achieved by a combination of enhanced excitability (a strong sexual signal), stronger erections, and better orgasms. If your goal is to achieve the ultimate in sexual health, look no further – **Ultimate Libido™** is here.

NOTE: It is also extremely important to maintain proper prostate health when concerned about sexual performance. For this reason, **Ultimate Libido™** is best taken in combination with **Ultimate Prostate Solution™**.

SUGGESTED USAGE:

Take three capsules in the morning with or without food and another 3 approximately 1 hour prior to sexual activity or as directed by a health practitioner.

OPTIONAL INFORMATION: Unlike anabolic steroids, which can cause cells that are responsible for manufacturing testosterone to stop producing testosterone, **Ultimate Libido™** does not negatively interfere with testosterone producing cells and therefore won't cause a reduction in future testosterone levels.
