

CANDIGONE

PRODUCT KNOWLEDGE SHEET

WHAT IS CANDIGONE?

CandiGone is a 15 day broad spectrum antifungal and antibacterial herbal cleanse. It specifically targets yeast organisms and eliminates them from the body.

HOW IS IT DELIVERED?

CandiGone is a two part cleanse. CandiGONE I is a powerful antifungal and antibacterial herbal formula delivered in vegetable capsules. CandiGONE II is a liquid tincture containing antifungal and antibacterial herbal extracts.

WHAT DOES IT DO?

CandiGone is formulated to eradicate yeast / Candida and microbial type organisms from the body.

WHAT IS CANDIDA?

Yeast organisms (Candida) are normally present in our intestinal tract in small amounts. The ideal ratio of yeast to bacteria in the body is 1 yeast organism to 1 million bacteria. However, this balance can easily be destroyed. For example, antibiotics kill not only the bacteria we want to get rid of, but also the good bacteria in the digestive tract. This leads to Candida overgrowth. Other drugs which can affect this balance include: anti-inflammatory, cortisone, and birth control pills. Poor diet (too many refined carbs), stress, and nutrient deficiencies can also lead to an imbalance.

Yeasts are parasitic organisms that deprive us of nutrients and eliminate toxic waste. They have been found to produce over 70 known toxins. When Candida grows from its yeast form into a fungal form, it creates waste products known as 'mycotoxins'. Among the mycotoxins produced is 'acetaldehyde', a poison that is converted by the liver into alcohol. As alcohol builds up in the system, symptoms associated with alcohol intoxication develop. This is why one of the most common symptoms of Candida is 'brain fog'.

In its fungal form, Candida grows long roots called 'rhizoids' that puncture the intestinal lining, leading to a condition called Leaky Gut Syndrome. This means that the digestive tract has holes in it, allowing Candida to pass through into the bloodstream. When undigested food particles leak through these holes and enter the bloodstream, the body views them as foreign invaders. This can result in food allergies or sensitivities, and autoimmune diseases. As mycotoxins become abundant in the body, more serious and chronic conditions can develop. Toxins tend to settle in the organs and tissues of greatest weakness. As everyone has a different area of genetic or acquired weakness, each individual can manifest a different disorder. This explains why Candida symptoms can be so wide-ranging.

HOW DOES IT WORK?

CandiGONE is formulated with a broad spectrum of antifungals, in order to target the many different types of yeast organisms. Yeast is a pleomorphic organism, which means it can change form. Just as certain bacteria have been known to become antibiotic resistant, yeast can become antifungal resistant. By using more than one type of antifungal, yeast is not likely to adapt.

CandiGONE also includes antibacterial herbs. When bad bacteria overgrows, it produces an environment where Candida can thrive. By removing the bad bacteria, good bacteria (i.e., acidophilus) can thrive and greatly reduce the chance of Candida reinfestation.

HOW DO I TAKE IT?

Take 2 capsules of CandiGONE I and 20 drops (1 ml) of CandiGONE II in the morning on an empty stomach. Take 2 capsules of CandiGONE I and 20 drops (1 ml) of CandiGONE II in the evening on an empty stomach. This regiment should be followed for 15 days.

PLEASE NOTE: People who have Candida are usually symptomatic. For mild to moderate Candida 1 CandiGONE Kit should be sufficient. If your Candida is severe, you may require more than 1 kit. You should continue cleansing with additional kits until symptoms subside.

WHAT CAN I EXPECT?

Your Candida symptoms may intensify for several days before they get better. When yeast organisms are killed by antifungals, they decompose in the body and produce by-products. These by-products (such as ammonia) can cause headaches and / or nausea. These symptoms can be alleviated by using a quality fibre supplement (FibreSMART), as fibre absorbs dead yeast cells and brings them to the colon for elimination.

SUPPORT PRODUCTS

Although CandiGONE is formulated to work on its own, there are 3 important support products which will increase the success of ridding your body of yeast organisms:

FibreSMART: An important aspect of cleansing is to ensure that fibre intake is at an optimal level (30 to 40 grams). Fibre absorbs toxins and yeast and brings them to the colon for elimination. It is recommended that you use FibreSMART as part of your cleansing program and as maintenance afterwards.

FloraSMART: Probiotics are 'friendly' bacteria which help to ensure a healthy balance between 'good' and 'bad' bacteria in the intestinal tract. FloraSMART, a patented blend of probiotics, is the only probiotic on the market that uses the 'Bio-Tract™' delivery technology. This technology ensures that the probiotics are properly used by the body and not destroyed in the stomach like most probiotic formulas.

CandiZYME: CandiZYME is a powerful enzyme product, specifically formulated to destroy the protective cell walls of yeast organisms. This ensures that the antifungal herbs in the CandiGONE can destroy the yeast more quickly. CandiZYME also works to digest the proteins and sugars that these cells use for fuel, making it difficult for the Candida and yeast cells to replicate.

What does it contain?

CANDIGONE I

There are two major categories of ingredients used in the CandiGONE I:

Antifungal

- ♦ Caprylic Acid
 - ♦ an organic fatty acid which has been used as an antifungal for over fifty years.
- ♦ Barberry Root
 - ♦ contains the alkaloid berberine.
- ♦ Berberine Sulphate
 - ♦ alkaloid effective against trichomonas vaginalis.
- ♦ Garlic Bulb
 - ♦ garlic extract and its constituents diallyl disulphide and allyl alcohol have anti-candida properties by triggering apoptotic cell death to yeast organisms.
- ♦ Grapefruit Seed Extract
 - ♦ potent broad spectrum antifungal
- ♦ Neem Leaf
 - ♦ contains antifungal properties.
- ♦ Olive Leaf
 - ♦ effective against candida albican.
- ♦ Pau D'Arco Root Bark
 - ♦ contains lapachol which has antifungal properties.
- ♦ Uva Ursi
 - ♦ (also known as bearberry) effective against candida albican.

Antibacterial

- ♦ Barberry Root
 - ♦ contains the alkaloid berberine.
- ♦ Berberine Sulphate
 - ♦ concentrated active anti-bacterial compound.
- ♦ Garlic Bulb
 - ♦ strong antibacterial activity even against multi-drug resistant strains of E-coli.
- ♦ Neem Leaf
 - ♦ contains strong antibiotic alkaloids.
- ♦ Uva Ursi
 - ♦ Ability to eradicate the bacteria associated with infections of the urogenital (bladder/urethra) tract.

CANDIGONE II

There are two major categories of ingredients used in the CandiGONE II:

Antifungal

- ♦ Cinnamon Bark
 - ♦ effective against oral candidiasis.
- ♦ Clove Bud
 - ♦ contains antifungal properties.
- ♦ Orange Peel
 - ♦ effective against 12 different types of fungi.
- ♦ Oregano Leaf
 - ♦ contains antifungal properties.
- ♦ Oregon Grape Root
 - ♦ contains berberine (see above).
- ♦ Pau D'Arco Root Bark
 - ♦ contains lapachol which has antifungal properties.
- ♦ Peppermint
 - ♦ effective against 11 different types of fungi.

Antibacterial

- ♦ Cinnamon Bark
 - ♦ effective against E-coli.
- ♦ Clove Bud
 - ♦ effective against E-coli.
- ♦ Orange Peel
 - ♦ effective against 22 different bacterial strains.
- ♦ Oregano Leaf
 - ♦ effect against E-coli, Salmonella, and at least 12 other microorganisms.
- ♦ Oregon Grape Root
 - ♦ contains berberine (see above).
- ♦ Peppermint
 - ♦ effective against 22 different bacterial strains.

CandiGONE I - Each capsule contains

Uva Ursi Leaf (<i>arctostaphylos uva ursi</i>) 20% arbutin	150mg
Garlic Bulb (<i>allium sativum</i>) 200ppm allicin	75mg
Caprylic Acid (<i>magnesium caprylate</i>)	75mg
Grapefruit Seed Extract (<i>citrus paradise</i>)	38mg
Pau D'Arco Root Bard (<i>tabbebuia heptaphylla</i>) 4:1 extract	38mg
Barberry Root (<i>barberis vulgaris</i>) 6% alkaloids	25mg
Neem Leaf (<i>azadirachta indica</i>) 5:1 extract	25mg
Olive Leaf Extract (<i>olea europa</i>) 18% oleuropein	25mg
Berberine Sulfate	12.5mg

Other Ingredients: Vegetable Capsules

Excipients: None

Contains no dairy, wheat, gluten, soy, corn, yeast, animal products, additives, or preservatives.

Warning: Discontinue use if abdominal pain, nausea, vomiting, or diarrhea occurs. Do not use if pregnant, nursing, or after recent surgery. Do not exceed recommended dose. Keep out of reach of children.

CandiGONE II - Each serving (1ml) contains

An Extract derived from	
Oregano Leaf (<i>oregano vulgare</i>)	39.6mg
Orange Peel (<i>citrus sinensis</i>)	33mg
Oregon Grape Root (<i>mahonia aquifolium</i>)	33mg
Pau D'Arco Root Bard (<i>tabbebuia heptaphylla</i>)	33mg
Cinnamon Bark (<i>cinnamomium cassia</i>)	20mg
Clove Bud (<i>syzygium aromaticum</i>)	20mg
Peppermint Leaf (<i>mentha piperita</i>)	20mg

Other Ingredients: filtered water, ethyl alcohol

Excipients: None

Contains no dairy, wheat, gluten, soy, corn, yeast, animal products, additives, or preservatives.

Warning: Discontinue use if abdominal pain, nausea, vomiting, or diarrhea occurs. Do not use if pregnant, nursing, or after recent surgery. Do not exceed recommended dose. Keep out of reach of children.
